Husband; **Keith Bradbury** lost 17 May 2005  
Royal Bolton Hospitals NHS Trust

Val Bradbury lost her soul mate and lifetime friend when she lost Keith, he had also contracted MRSA. She also became extremely ill shortly after his death and was admitted to Hospital where she had her large intestine and spleen removed in a life saving operation. Two years on from that operation she found out she had actually contracted C Diff. Neither she nor her family were alerted of this at the time of her illness. But she is determined to help campaign for Safer Standards within our Healthcare System.

Val is an experienced fundraiser and for many years was on the board of the PTA council. Val also has many years of dealing with the bereaved as she worked for a Funeral Director, and is therefore experienced in supporting and offering advice to the bereaved.

Val has two grown up sons and also grandchildren and is determined that their future Healthcare is of paramount importance.

Val has many influential contacts who have all pledged their allegiance to **NCHI** campaign for Patient Safety.

Val works very closely with Bev in supporting the families in the Northwest
